Central West, South East & Illawarra Region, Nowra

**Presentation of Poster Display and Notes at the
National Conference on Acid Sulphate Soils
Coolangatta - 24th - 25th June 1993**

Please find attached a paper prepared for either general distribution at the Conference or to enquirers at the poster display. The paper entitled "Mapping Grassland Ecosystems as an indicator of Acid Sulphate Soils on the Lower Macleay River Floodplain, Kempsey New South Wales" is a non technical paper, basically stating the results of the project. Please run off the required numbers of copies. It is suggested that the attached Grassland Ecosystem image be used to produce black and white copies. That is with the pink mask.

Forward under seperate cover is a poster display prepared at Goulburn. Please return the poster to myself at the conclusion of the conference.

Also enclosed is the colour photograph 3499/77 of Belmore River, Kempsey.

Regards for the conference.
