

### Species attributes

Scientific name:	<i>Prasophyllum canaliculatum</i>
NSW status:	Critically endangered
Commonwealth status:	Not listed
Management stream:	Site-managed

Photographer: Jackie Miles

### Overall project status\*

Populations at all sites are on target.

Populations at one or more sites were not monitored this year, but threat management is on target.  
Populations at remaining sites are on target.

Populations at one or more sites were not monitored this year, but threat management is not on target.  
Populations at remaining sites are on target.

Populations at one or more sites are not on target.

\* For SoS priority management sites (may not include all locations where the species occurs in NSW)

### Project summary

Priority management sites:	South East Forests National Park
Action implementation:	2 of 4 management actions were fully or partially implemented as planned for the financial year.
Total expenditure:	\$20,242 (\$15,242 cash; \$5,000 in-kind)
Project partners:	Office of Environment and Heritage

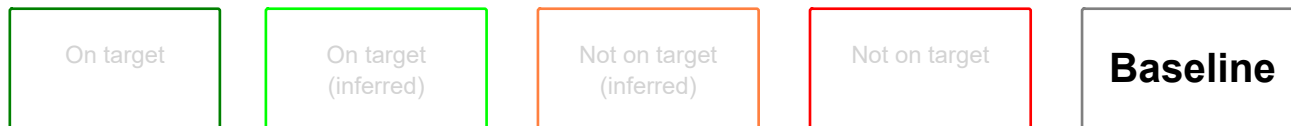

## Management site 1: South East Forests National Park

Local Government Area: Bega Valley; Snowy Monaro Regional

Project partners: Office of Environment and Heritage

Estimated species population size: 116

### Population status

### Monitoring

Index	Monitoring result	Confidence in monitoring	Conducted by
Species abundance	Complete census of Packers and Devils Swamps found 116 individuals.	High	Office of Environment and Heritage

### Investment

Project participant	Cash	In-kind
Office of Environment and Heritage	\$15,242	\$5,000

### Management actions

The project actions below (including research and survey actions) are those identified as being required in 2016-17 to secure the species in the wild.

Threat	Management action	Implemented as planned?
Foraging and disturbance (wallowing) by feral pigs.	Trapping and shooting as required.	Yes
Grazing and disturbance (wallowing) by feral deer.	Ground and aerial shooting.	Yes

### Threat status

This table includes critical threats that were monitored at this site, this financial year.

Threat	Annual target	Threat status	Confidence in monitoring
Foraging and disturbance (wallowing) by feral pigs.	Collect baseline data.	Baseline	High

### Site summary

First year of data collection for *Prasophyllum canaliculatum* and its threats under Saving our Species.
